EDUCATION

Sai Gon University

B.E. Software Engineering

Expected March 2027

GPA: 2.89/4.0

COURSEWORK

Courses: Object-Oriented Programming, AI Fundamental, Algorithm Design & Analysis, Python, Discrete Math, Linear Algebra, Calculus, Probability & Statistics

SKILLS

Languages: Python, SQL, LaTeX

English: IELTS 6.0 (January 2026)

Tools/Systems: Git

PROJECTS

AI Hotel Receptionist – AABW Hackathon  | *AI Agent, ESP32-S3, API Integration*

July 2026

- Collaborated with a team to build an AI-powered hotel receptionist that automates common guest-support tasks.
- Contributed to booking verification flows using the guest's name, phone number, or booking ID.
- Helped develop nearby-place recommendation flows and integrate the AI assistant with an ESP32-S3 device.
- Participated in end-to-end testing, debugging, product demonstration, and the final hackathon presentation.

AI-powered Personal Schedule Assistant  | *Python, LangChain, RAG, Qwen LLM, Streamlit*

April 2026

- Collaborated in a team to build an AI agent for intelligent personal schedule recommendations.
- Engineered the core pipeline using the LangChain framework, integrating Retrieval-Augmented Generation (RAG) with the Qwen large language model.
- Configured and deployed an interactive frontend utilizing Streamlit, managing environment variables and Hugging Face API integrations.

Personal Schedule Assistant  | *Python, Streamlit, NLP, SQLite*

December 2025

- Developed a comprehensive scheduling application with a frontend-backend architecture to manage daily tasks and routines.
- Integrated Vietnamese text correction models to process natural language inputs and dynamically schedule events.
- Implemented customizable audio alarms and persistent data storage using SQLite.

Sentiment Analysis  | *Python, NLP, Machine Learning*

December 2025

- Developed an NLP application to classify the emotional tone of text as positive, negative, or neutral.
- Built the data processing and model evaluation pipeline entirely in Python using machine learning techniques.
- Implemented frontend and backend modules for real-time user interaction and sentiment history tracking.

HOBBIES

Physical Exercise

June 2026

- Regularly engage in physical activities to maintain good health, discipline, and mental clarity.

Watching English Videos

June 2026

- Watch videos in English to improve listening skills, pronunciation, and natural language understanding.
